Tropical Dog Training

Tropical Dog Training

If you live in the Miami, Orlando, or Tampa areas, get your dog the training that can turn your pet into the smart, well behaved family member you can bring anywhere. We specialize in positive behavior techniques that will teach your dog more than just "come, sit and stay." Your dog will learn the skills they need to adjust to family life. Your dog will be happier, calmer, and more confident too.

Tropical Dog Training has become the leading dog training facility for pets throughout the Miami, Orlando and Tampa areas. The Florida dog trainers focus on practical, easy-to-learn behavior modification techniques.

In-Home Training

The in-home program provides all the information required to train your dog to an advanced trained state. An advanced trained dog responds around distractions as well as off leash.

Let us know your schedule and we will train you and your dog in the comforts of your own home. Private Sessions create an atmosphere conducive to learning. The in-home program is designed to teach you what you need to know in order for you to train your dog.

The in-home program will also address those annoying issues such as nuisance barking, jumping, running away, chewing, escaping, stealing, pulling on leash and a lot more. The in-home program does not stop there it provides information on how to set-up the ideal living environment for your dog, develop a bond with your dog and establish the structure and schedule that your dog requires.

Florida Board and Train

Tropical Dog Training will work with you to determine your dog training goals. Tropical Dog Training will establish a custom training program to achieve these goals. Your dog will be picked up and brought to our training facility where they will stay for three weeks learning to sit, lie down, come, wait, heel, place and off. Your dog will be trained to an advanced state which means they will respond around distractions and off leash. Besides learning the standard obedience cues, your dog will be taught appropriate behaviors to replace un-wanted behaviors.
